

## Key Figures in 2021

**1** European Research Infrastructure for biobanking with GBN as the national hub in Germany

**1** Central Office of the German Biobank Node (GBN) coordinates all national activities

**1** IT Site implements an IT framework for sample and data requests across all GBA biobanks

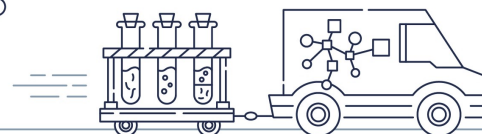

**21** Biobank Sites are partner of the German Biobank Alliance (GBA) and build the network

**13,634,752** Tissue Samples are available on request from 21 biobank sites

**20,734,329** Liquid Samples are stored in GBA biobanks and obtainable

**2,334,121** Derivates such as nucleic acids, cells and more are available on request

**444,278** Samples delivered to scientists to be used for medical research projects

**270** First-Time Users requested samples, data and/or services from GBA biobanks

**1,856** Research Projects have been supported by GBA biobank services

**98** Publications authored by GBA biobanks

**492** Publications as outcomes of research projects involving GBA biobanks
